

# Physics Pumpkin Carving Stencil

## *ATLAS Experiment Event Display*

### **Directions:**

1. Print this template, adjusting size of print-out to match the size of your pumpkin.
2. Tape paper to the pumpkin, and trace the shape using either pins, a paper cutter or exactoblade.
3. Remove paper and make final additions to the trace.
4. Carve out the design - or leave it on the pumpkin as drawn decoration!

*The Large Hadron Collider smashes particles together at the centre of the ATLAS Experiment. The resulting collisions are detected and recorded by ATLAS, creating a particle "event display".*
